Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Withdrawal of Finality of Previous Office Action

The finality of the previous Office action (mailed January 27, 2004) is hereby withdrawn.

Previously Set-Forth Rejections

The following rejections set forth in the previous Final Office action are hereby withdrawn in view of applicant's arguments, filed with the amendment of April 27, 2004, which are found to be persuasive: The 35 U.S.C. 102(b) rejection of claims 12, 14-23 and 25-29 as being anticipated by Sato (U.S. Patent No. 3,557,780) and the 35 U.S.C. 103(a) rejection of claims 13 and 24 as being unpatentable over Sato (U.S. Patent No. 3,557,780) in view of Kovalchek (U.S. Patent No. 5,549,542).

The following new grounds of rejection are set forth:

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 12-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,699,182. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 12-27 of the instant application are merely broader than claims 1-10 of U.S. Patent No. 6,699,182 (hereinafter, the '182 patent).

Claim 1 of the '182 patent contains all of the limitations recited in claims 12 and 23 of the instant application and additional elements, such as an elongated tip and a tip control device, that claims 12 and 23 of the instant application do not recite. Claims 12 and 23 of the instant application differ from claim 1 of the '182 patent in the recitation that in claims 12 and 23 of the instant application, the pulling and/or pushing elements each act on the shaft "at locations spaced apart from the proximal end of the shaft" whereas claim 1 of the '182 parent recites "at difference distances from the proximal end of the shaft". Since the recitation of "at different distances from the proximal end of the shaft" is narrower than the recitation "at locations spaced apart from the proximal end of the shaft" (i.e., the recitation of spaced apart does not necessarily require that the elements be positioned at different distances), claims 12 and 23 of the instant application are broader than claim 1 of the '182 patent.

The following is a list of the claims in the instant application and the claims in the '182 patent to which they correspond (are either identical to or not patentably distinct from):
